“
Law enforcement is now a technology-driven enterprise. This system will solve crimes previously thought to be unsolvable using today’s methods.
”

Fred Thompson
CHIEF OF POLICE
VALLEY CITY, ND

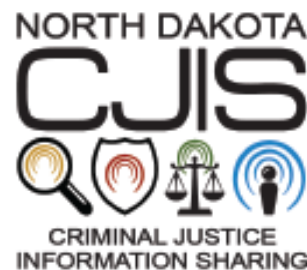

North Dakota Agencies Participating in ND LERMS

 Police Departments
 County Sheriffs
 Jails

The police departments and sheriff's offices shown above are in various stages of upgrading to the new P1 - LERMS.

A SERVICE PROVIDED BY:

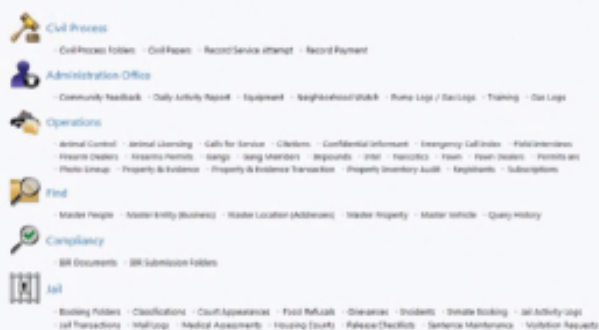

The North Dakota Criminal Justice Information Program (CJIS) improves public safety by providing effective and efficient justice policies, processes, and information systems to capture and share complete, accurate, and timely information to support informed decision making across jurisdictional and organizational boundaries statewide.

NORTH DAKOTA CJIS
LERMS
Law Enforcement Records Management System

EFFICIENT DATA MANAGEMENT FOR NORTH DAKOTA LAW ENFORCEMENT

The North Dakota Criminal Justice Information Program (ND CJIS) strives to put valuable information in the hands of criminal justice personnel at the time and in the format that meets their needs. To this end, ND CJIS is pleased to announce the launch of Motorola's PremierOne Law Enforcement Records Management System (ND LERMS - P1).

RECORDS MANAGEMENT

ND LERMS - P1 is a valuable tool for many record management purposes, including:

Case Management

NIBRS Reporting, Case Reports and Juvenile Referrals

Operations Management

Animal Licensing, Calls for Service, Citations, Civil Process, Field Interviews, Gangs & Gang Members, Intel, Narcotics, Permits & Licensing, Photo Lineup, Property & Evidence, and Warrants

Administrative Management

Daily Activity Report, Equipment, Gas & Pump Logs, and Training

Communications

Agency Reporting, Specialized Mandated Reporting (such as PREA and CLEAR), Workflow Assignments, and Alerts

Jail Management

Booking, Grievances, Incidents, Medical Assessments & Screening, and Release Checklists

INFORMATION SHARING

ND CJIS is working on several information sharing interfaces to reduce duplicate data entry, including TraCS and drivers license data. To assist law enforcement functions, future information sharing enhancements include:

- Paperless export of defendant information and charging recommendations to ND CJIS's State's Attorney Record Management System (ND STARS)
- Automatic import of relevant court information, including hearings and dispositions
- Option to send data to LiveScan devices
- CAD integrations
- Possible dual-display of federal and state data
- Automated JMS victim registration for notification

ND LERMS - P1 Jail Management System includes training, installation, hosting and maintenance, data security, 24/7 support, and ND GOV Account and Juniper VPN, if needed. Also, agencies have the opportunity to provide a representative for the ND LERMS - P1 Governance Committee to help determine future enhancements.
